HondaJet *APMG S* - Confidence. Control. Capability.

Autopilot Coupled Go-Around

In the event of a missed approach, the autopilot will automatically remain coupled and sequence the FMS to the missed approach segment, reducing pilot workload and enhancing precision.

Electronic Stability & Protection

Intelligent envelope protection that actively assists pilots in maintaining stability and control by helping to prevent stalls and unsafe maneuvers.

Graphical Weight and Balance

Displays Basic Empty Weight and CG location, allowing pilots to input loading and fuel data to estimate takeoff and landing weights, landing fuel, and excess fuel. All shown graphically on the Multi-Function Display.

Takeoff/Landing Distance (TOLD) Management

Provides automatic computation of required runway length, V-speeds, climb/approach gradients, etc. in accordance with FAA TOLD standards
